

# Single cell RNA- seq Usermeeting

A workshop organized by the project RIAT-CZ.

Friday  
November  
30

13.00 – 15.00

GMI Orange seminar room

The Core Facility Next Generation Sequencing has - in cooperation with the partnering Core facility Genomics at CEITEC – established a new service „Single Cell Sequencing“

Interested users in this service will get detailed information on the new service, such as protocols, procedures, advantages, purposes.

The workshop will be led by Andreas Sommer, head of VBCF-NGS, NGS' sequencing specialist and laboratory manager Dr. Carmen Czepe and Bioinformatician Ido Tamir.
