Area of interest

Discharge of the main line

/bahntechologie
& mobilität

State of infrastructure

Vienna – Breclav

- 65,993 km
- Double track
- 120 km/h
- 140 km/h Drösing→Stillfried
- Category D4
- Inclination < 5‰
- Electrification ~ 15 kV 16,7 Hz
- ETCS Level 2

State of infrastructure

Vienna – Laa an der Thaya

- 67,52 km
- Track ► Double: Vienna-Wolkersdorf
 - Single track: Wolkersdorf-Laa
- 60-120 km/h
- 140 km/h: Kapellerfeld-Obersdorf
- Category D3
- Inclination < 13‰
- Electrification ~ 15 kV 16,7 Hz
- PZB

State of infrastructure

Vienna – Znojmo

- 83,51 km
- Double track: Vienna-Stockerau
- Single track: Stockerau-Znojmo
- 70-120 km/h
- Category D4
- Inclination < 12‰
- Electrification ~ 15 kV 16,7 Hz
- PZB

Bottlenecks and weaknesses

Limited capacity of the main itinerary (Nordbahn)

/bahntechologie
& mobilität

Bottlenecks and weaknesses

Missing bridge between Laa and Hevlín

Extension projects

Planned upgrade of the Nordbahn

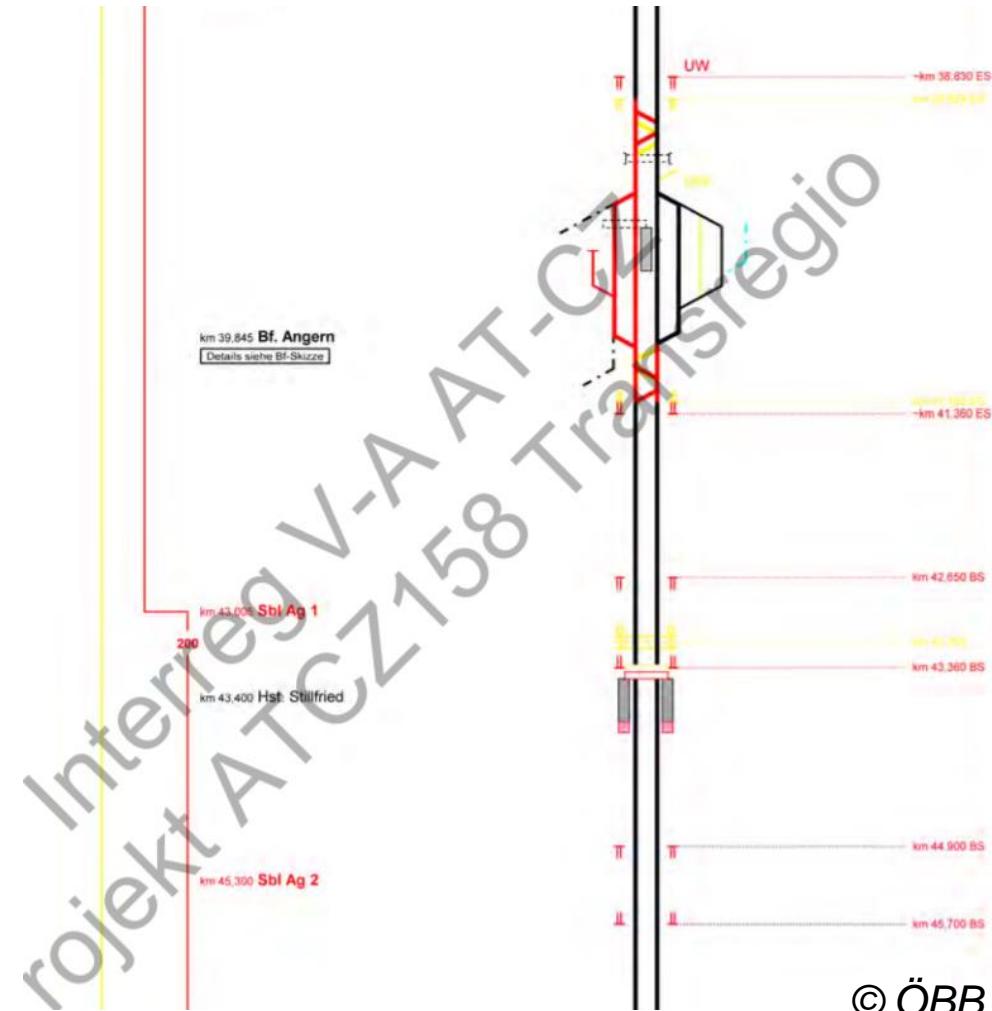

I/bahntechnologie
& mobilität

- **Speed augmentation**
from 120-140 km/h to
160-200 km/h

16

- **Additional signals** to
densify the blocks
